

EUCAVISCO®

A matter of comfort

EN

MADE IN EUPEN

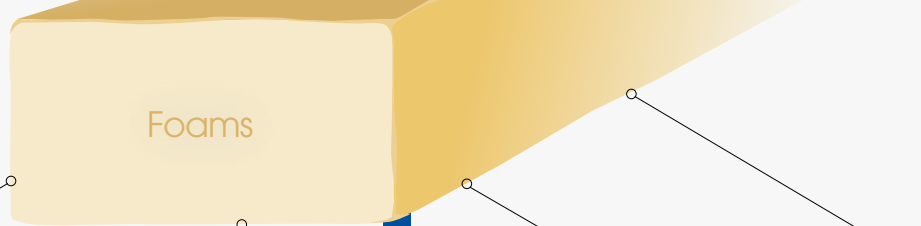

Looking for high-quality foams?
Here's your choice!

Our foams in three variants:

- first** Highest performance and comfort
- plus** Noticeably more performance
- classic** Proven quality

15-85 BD This product offers bulk densities (BD) in a range of 15-85 kg/m³.

EUCABASE®
The stable and robust foam

- up 24 BD
- 25-39 BD
- from 40 BD

EUCASELECT®
Diverse quality for high-quality products

- up 39 BD
- 40-49 BD
- from 50 BD

EUCAFEEL®
High-end special foam for premium products

- up 44 BD
- from 45 BD

EUCAVISCO®
Comfort foam with memory effect

- up 49 BD
- 50-59 BD
- from 60 BD

Special breathability:
The open-pore cell structure enables a high degree of air circulation

Reliable hardness:
Tight tolerances ensure consistent quality

Extensive certification:
Our safe, low-emission products exceed by far the required standards

Practice-oriented specialists:
Best chemical expertise, decades of experience, constant striving for innovation

Unique formulation:
High-quality raw materials, special stabilizers and optimized catalysis

State-of-the-art process engineering:
German machine technology and high pressure foam systems

Foam for
maximum comfort?
Absolutely – thanks to
memory effect together
with breathability.

EUCAVISCO®

The comfort foam with memory effect

Your customers will float

And so it should be: With EUCAVISCO® the mattress fits ideally the body, and not the other way around. This is the great advantage of the memory effect. For customers, this means **perfect pressure relief**. Whether neck, shoulder or back pain: EUCAVISCO® supports correct orthopaedic posture and sleeping without pressure points.

EUCAVISCO® offers your customers comfort – no matter whether they sleep on the side, stomach, or back. Once your customers are in their required sleeping position, they experience a feeling that comes very close to **weightlessness**. EUCAVISCO® – **A matter of comfort.**

Optimum memory effect: Our foam products from the EUCAVISCO® brand set new standards in terms of comfort. The **visco elastic properties** of our premium foams excellently apply the memory effect. Thanks to the shape memory, the visco foam reacts neither too slowly nor too quickly but responds appropriately to the sleeping body.

Thanks to the carefully selected visco polyols, the foam undergoes an **optimum pressure distribution**. The body therefore sinks into the foam true-to-form.

The EUCAVISCO® foams respond particularly well to pressure-sensitive body parts.

The optimum
memory effect?
The mattress responds
perfectly to
the body – not too slow
and not too fast.

Visco foams with
a high level
of air circulation?

Yes, there are.

Thanks to the open cell
structure.

Open cell structure for the best sleeping climate

The **high open porosity** with simultaneous memory effect is a remarkable aspect to our EUCAVISCO® foams. As a result, they differ considerably from standard visco foams. Conventional visco foams typically exhibit a half-open cell structure.

The advantage of the open cell structure by EUCAVISCO®: Our premium foams are **breathable and permeable to air**. While conventional visco foams often have a higher resistance value, EUCAVISCO® offers a much better air circulation with 0.5 mm to 15 mm water columns. Consequently, EUCAVISCO® foams achieve optimal ventilation.

A dry sleep for your customers

Everyone perspires during sleep and, in doing so, releases water into the mattress. The task of the mattress is to regulate the absorption of the water.

EUCAVISCO® products carry out this task with great success due to the **open cell structure**.

A further advantage for your customers: The open pores allow the air to circulate extensively. This leads to a considerably less odour or bacterial development. This ensures a very **special sleeping climate**. EUCAVISCO® – **A matter of comfort.**

Cell structure:

The open cell structure ensures optimum air circulation.

Staying healthy with the
right foam?

That's possible – with the
anti-decubitus effect.

Excellent anti-decubitus effect

EUCAVISCO® achieves an excellent anti-decubitus effect thanks to the optimal memory effect. The air circulation also ensures a dry sleeping climate. Consequently, EUCAVISCO® significantly counteracts the development of bed ulcers. Our EUCAVISCO® foams are actually recognized as medical foams in various European countries.

EUCAVISCO® foams respond optimally when the body sinks into the mattress. This is because of the high degree of freedom of movement with simultaneous memory effect. As a result, our EUCAVISCO® products exceed even the highest requirements for a good night's sleep.

Your customers stay healthy

EUCAVISCO® provides your customers with expertise in the field of health. The visco elastic properties of our foams cause an **anti-decubitus effect**. Consequently, there are no bedsores and the body is effectively and sustainably protected.

Pure relaxation: The body sinks optimally into the foam due to the interplay of freedom of movement and memory effect. Your customers will feel the difference to other foams. EUCAVISCO® – **A matter of comfort.**
